

## Please join us for a symposium on Cancer Genomics

At Foster City, CA on November 19, 2018, 6:00 pm to 9:00 pm PST

**Dr. David Christiani**

**Talk Title: A Multi-Omics Approach for the study of Lung Adenocarcinoma**

Elkan Blout Professor of Environmental Genetics  
Department of Environmental Health, Department of Epidemiology  
Harvard T.H. Chan School of Public Health

Dr. David's major research interests are occupational, environmental and molecular epidemiology. He has been interested in studying the impact of exposures to various pollutants on health and the interactions between host factors (genetic and acquired susceptibility), and environmental exposures in producing acute and chronic diseases.

**Dr. Prithwish Pal, PhD, MBA**

**Talk Title: TBD**

Sr. Market Development Manager, Oncology, Illumina, Inc

Dr. Prithwish Pal has an unique blend of scientific acumen, business insights and commercial experience to drive development, and global marketing of innovative products and services. His technical and domain knowledge covers a range of fields within the life sciences and clinical spaces, including genomics, bioinformatics and molecular diagnostics.

**Dr. Papia Chakraborty**

**Talk Title: TCR-based immunogenicity prediction and screening solutions for immunotherapy research**

Sr. Scientist and Head of Immuno-oncology, MedGenome Inc.

Experienced biomedical researcher with 13 years of wet lab expertise in designing, execution and managing various studies in the areas of immuno-oncology, cell-therapy and cancer-biology.
